Demo Rehearsal Evidence - 2026-05-25

Scope

This evidence log combines:

- automated end-to-end API rehearsal
- runtime health checks
- emulator device-level app launch verification

Environment Snapshot

- Backend health: PASS
- Metro customer (8081): PASS
- Metro barber (8082): PASS
- Database health: connected

Test Evidence Files

- Rehearsal output report: [LIVE_REHEARSAL_REPORT.md](../../LIVE_REHEARSAL_REPORT.md)
- Customer app screenshot: evidence_customer_current.png
- Barber app screenshot: evidence_barber_current.png

Pass/Fail Summary

Test Case	Status	Evidence
Backend health endpoint	PASS	`npm run dev:health` + API `/health`
Customer Metro running (8081)	PASS	`packager-status:running`
Barber Metro running (8082)	PASS	`packager-status:running`
Customer app launches	PASS	`mCurrentFocus=com.barbercustomerapp/.MainActivity` + screenshot
Barber app launches	PASS	`mCurrentFocus=com.trimridebarber/.MainActivity` + screenshot
Customer auth flow (API)	PASS	`live_rehearsal.js` step pass
Barber auth flow (API token path)	PASS	`live_rehearsal.js` step pass
Customer creates booking	PASS	Booking id 66 created in rehearsal
Barber sees incoming request	PASS	Rehearsal request visibility pass
Barber accepts booking	PASS	Rehearsal accept step pass
Customer sees active booking	PASS	Rehearsal active booking step pass
Barber sends location update	PASS	Rehearsal location step pass
Payment route (demo stub)	PASS (stub)	Rehearsal payment step pass
Customer booking history update	PASS	Rehearsal history step pass
Manual in-app accept/decline flow on devices	PENDING	Runbook execution still required
Real-network (non-localhost) full pass	PENDING	Must run before investor meetings
Production-grade payment confirmation flow	PENDING	Hardening phase not complete

Notes

- This evidence is strong for MVP functionality and live demo readiness.
- Do not position payments as production-grade card processing yet.
- Before investor meetings, run one final quick rehearsal and refresh screenshots the same day.
