TrimRide Investor Deck Draft

Slide 1: Cover

TrimRide

Real-Time Barber Marketplace

Customer + Barber Apps Live Today

Prepared: May 2026

Slide 2: Problem

Barber bookings are still fragmented and slow.

Customers struggle with:

- Delayed responses
- Unclear arrival times
- Poor visibility after booking

Barbers struggle with:

- Unpredictable demand
- Missed nearby requests
- No modern dispatch workflow

Slide 3: Solution

TrimRide is a two-sided, real-time marketplace for grooming-on-demand.

- Customer app for request and live tracking
- Barber app for online status and incoming requests
- Shared backend with real-time events, booking lifecycle, and push messaging

Slide 4: Product Proof (What Works Now)

Working now in live dev environment:

- Customer and barber authentication
- Customer booking request flow
- Barber online dashboard and request queue
- Booking status progression
- Real-time socket updates
- Push notification token registration and delivery pipeline validation

Slide 5: Customer Experience

Current customer value:

- Browse and request quickly
- Service filters and best-match card
- Current booking card with status updates
- Live tracking handoff after confirmation
- Cleaner language and UX hierarchy for confidence and clarity

Slide 6: Barber Experience

Current barber value:

- Online or offline availability control
- Incoming request visibility
- Fast action surfaces for daily operations
- Busy-area and promotions entry points
- Cleaner empty, loading, and status messaging

Slide 7: Technology and Readiness

Architecture in place:

- React Native customer app
- React Native barber app
- Node and Express API backend
- PostgreSQL data layer
- Socket-based real-time updates
- Firebase push plumbing

Execution readiness:

- Automated dev stack startup and health checks
- Regression checks run repeatedly during iteration

Slide 8: Business Model

Revenue model:

- Commission per completed booking
- Priority placement or featured barber subscriptions
- Promotions tools for barber growth campaigns

Future expansion:

- In-app wallet and subscriptions
- Team and salon management packages

Slide 9: Go-To-Market Plan

Phase 1: Single city pilot

- Focused neighborhoods
- Curated early barber supply
- Fast customer response loop

Phase 2: Repeatable expansion

- Zone-by-zone rollout
- Referral loops
- Performance marketing only after retention targets are met

Slide 10: Funding Ask and Use of Funds

Raise goal: Seed or pre-seed round (target range to define with investors)

Use of funds:

- Production payment hardening and compliance flow
- Reliability and observability

- Release and QA automation
- Growth experiments in pilot market

Milestone target:

- Move from validated MVP to scalable launch-ready platform

Appendix: Honest Current Gaps

Not yet fully production-complete:

- Full production payment lifecycle and webhooks
- Expanded real-device matrix testing
- Deeper analytics and operational dashboards

Closing Line

TrimRide is already beyond mockups. We have a functioning real-time two-sided product. Funding now accelerates hardening and launch, not basic discovery.
